MIL-STD-810G durability rating, EPEAT Gold, backlit keyboard

<b>What is MU-MIMO?</b>	It stands for Multi-user, multiple input, multiple output, and it breaks up your WiFi connection into multiple streams that allows your computer to both send and receive information on at the same time. 2X2 means you can send two streams of data whilst receiving two streams, which speeds up your internet connection.
<b>What is IPS?</b>	IPS (In-Plane Switching) screens give better colour and viewing angles than TFT screens.
<b>Why HDMI?</b>	HDMI ports allow you to connect your laptop to a big screen TV or projector with just one cable.
<b>USB 3.0</b>	USB 3.0 is a newer, faster version of USB. It comes in several speeds. Generation 1 (G1) is 5Gbps and G2 is 10Gbps. USB 4 gives you 20Gbps. Thunderbolt gives you 40Gbps and also allows you to connect a monitor using your Thunderbolt port.
<b>MIL-STD-810G</b>	This is a military spec that requires the laptop to pass various tests for shock (being dropped two feet to a hard surface), vibration, and exposure to dust, humidity and extreme temperatures.

\*Speedmark shows performance of CPU for business tasks - 1000 is the bare minimum for business tasks.
